

Shahd Ahmed Karam

Junior DevOps Engineer | AWS Cloud Engineer

✉ shahdahmed6662@gmail.com ☎ 01211951168 📍 Alexandria, Egypt 🔗 [LinkedIn](#) 🐙 [GitHub](#)

Professional Summary

Junior DevOps & AWS Cloud Engineer with hands-on project experience in designing and deploying cloud solutions on AWS. Skilled in Linux administration, Git, CI/CD automation using Jenkins and GitHub Actions, and containerization with Docker and Kubernetes. Experienced with core AWS services including EC2, VPC, IAM, S3, Load Balancer, and Auto Scaling. Strong foundation in networking, cloud security, and DevSecOps practices through NTI training. Passionate about building reliable, scalable infrastructure and continuously expanding technical expertise.

Technical Skills

Cloud

AWS (EC2, VPC, IAM, S3, EBS, EFS, ELB, Auto Scaling, CloudFormation, Lambda, CloudWatch, SNS, Systems Manager, VPC Peering)

Containers & Orchestration

Docker, Docker Compose, Kubernetes

Infrastructure as Code (IaC)

Terraform

Databases

MySQL

Security

IAM, Security Groups, AWS Systems Manager Session Manager

Version Control

Git, GitHub

CI/CD & Configuration Management

Jenkins, GitHub Actions

Networking

TCP/IP, DNS, HTTP/HTTPS, SSH, Load Balancing, VPC, Subnets, Security Groups, NACLs

Operating Systems

Linux (Ubuntu, CentOS)

Professional Experience

DevSecOps Track Scholarship, National Telecommunication Institute (NTI)

07/2025 – 11/2025
Cairo, Egypt

- Completed an intensive hands-on DevSecOps training program covering Linux, Git, Docker, Kubernetes, Jenkins, AWS, Terraform, Ansible, CI/CD, and monitoring tools.
- Built and deployed cloud and DevOps projects using AWS, Docker, Kubernetes, and Terraform.
- Implemented CI/CD pipelines using Jenkins and GitHub Actions.
- Applied Infrastructure as Code (IaC) concepts using Terraform.
- Gained practical experience in Linux administration, networking, cloud security, and automation.

Projects

Scalable Web Application on AWS | [GitHub](#) 🔗

- Provisioned highly available infrastructure using EC2, Auto Scaling Groups, Application Load Balancer, and Security Groups.
- Designed a Three-tier VPC architecture with public and private subnets across multiple Availability Zones.
- Configured ALB routing, health checks, and cross-zone load balancing.
- Integrated CloudWatch metrics, alarms, and SNS notifications for monitoring.
- Implemented IAM roles to securely grant EC2 access to AWS services.
- Managed EC2 instances securely using AWS Systems Manager Session Manager.

Microservices Voting Application on Kubernetes | [GitHub](#) 🔗, Kubernetes • Docker • ConfigMap • Secrets • PVC

- Deployed a multi-service voting application on Kubernetes using Deployments and Services.
- Configured NodePort and ClusterIP Services for external access and internal service communication.
- Managed application configuration using ConfigMaps and Secrets.
- Provisioned persistent storage for PostgreSQL using PersistentVolumeClaims (PVCs).
- Orchestrated frontend, worker, Redis, and PostgreSQL services within a Kubernetes cluster.

Infrastructure as Code on AWS | [GitHub](#) 🔗, Terraform, AWS

- Automated AWS infrastructure provisioning using Terraform.
- Created reusable Terraform modules and managed infrastructure through code.
- Provisioned core AWS resources including VPC, subnets, EC2 instances, Security Groups, and networking components.
- Used variables, outputs, and state management to improve infrastructure reusability and maintainability.

Listenary Mobile Application (Graduation Project) | [GitHub](#) , Python, OCR, TTS

- Developed a bilingual mobile application that converts printed and handwritten documents into readable and audible content.
- Integrated OCR and Text-to-Speech technologies to improve accessibility.
- Supported both Arabic and English languages.

Microservices Application with Docker Compose | [GitHub](#) , Docker • Docker Compose • Microservices

- Containerized multiple microservices using Docker.
- Orchestrated multi-container applications using Docker Compose.
- Configured container networking and service communication.
- Managed application configuration using Docker Compose.
- Simplified local development and deployment through containerization.

Hands-on Labs

AWS Networking & Security Labs , VPC Peering, Bastion Host, Route Tables, Security Groups

- Configured **VPC Peering** for private communication between VPCs.
- Implemented secure SSH access using a **Bastion Host**.
- Configured **Route Tables** and **Security Groups** for controlled network traffic.
- Validated connectivity between private EC2 instances across VPCs.

AWS Automation with Jenkins | [GitHub](#) , Jenkins • AWS CLI • AWS IAM • S3

- Configured a Jenkins Pipeline to automate AWS CLI tasks.
- Integrated Jenkins with AWS using IAM credentials and the AWS Credentials Plugin.
- Executed shell scripts to interact with AWS services using the AWS CLI.
- Scheduled automated pipeline execution using Jenkins Cron triggers.

Jenkins Automation Lab | [GitHub](#) , Jenkins • Git • Bash

- Developed a Declarative Jenkins Pipeline with parameterized builds.
- Implemented conditional execution using **when** expressions.
- Executed Bash scripts as part of the pipeline workflow.
- Configured post-build success and failure actions.

Docker Image Automation with Jenkins | [GitHub](#) , Jenkins • Docker • Docker Hub • Bash

- Automated Docker image build and publishing using Jenkins.
- Built Docker images from a Dockerfile and pushed them to Docker Hub.
- Managed Docker Hub authentication securely using Jenkins environment variables.
- Executed Bash scripts to automate the container build workflow.

Certificates

AWS Certified Solutions Architect – Associate (SAA-C03)

Amazon Web Services (AWS)

Professional DevSecOps Engineer

National Telecommunication Institute (NTI) 2025

CCNA Learning Path

Cisco CyberOps Associate

Education

B.Sc. in Computers and Data Science,,
Faculty of Computers and Data Science, Alexandria University

2021 – 2025
Alexandria, Egypt
